SUMMARY

Full Stack Python Developer with experience in building responsive and scalable web applications. Strong backend development skills using Python and Django for developing robust web applications. Passionate about continuous learning and delivering efficient, user-focused solutions.

PROJECT

Project Name: MYBRAND – Online Shopping Website

- Developed a responsive front-end e-commerce website using HTML, CSS, JavaScript, and Bootstrap with user-friendly navigation.
- Designed attractive product layouts displaying images, prices, and descriptions, ensuring compatibility across desktop, tablet, and mobile devices.
- Implemented a JavaScript-based search feature that allows users to find products easily using keywords or product names.

Project Name: Portfolio-React (Single Page Application)

- **Technologies:** React, HTML, CSS, Bootstrap, React Router
- Developed a responsive single-page portfolio website using React to showcase personal profile, skills, projects, and contact information with smooth navigation.

Project Name: UD-Traveler – Travel Booking Web Application (full-project-Django)

- Developed a full-stack travel booking web application using Django, HTML, CSS, and JavaScript
 - Implemented user authentication and dynamic destination browsing with search and filtering
 - Built a booking system with real-time price calculation and vehicle selection feature
 - Integrated payment functionality using UPI QR code and stored data in database
-

EDUCATION

M.G.R. College, Hosur

(B.C.A - Bachelor of Computer Applications) -(2022-25)- CGPA:6.53

Government Higher Secondary School (HSC)-(2021-22)

Government Higher Secondary School (SSLC)-(2019-20)

TECHNICAL SKILLS

- Programming Language: Python
 - Frontend Technologies: HTML5, CSS3, JavaScript, Bootstrap, React.js
 - Backend Framework: Django
 - API: REST API Development
 - Database: SQL
 - Tools: GitHub & VS-Code
-

CERTIFICATION

Full Stack Python Developer

Appin Technology Lab – Coimbatore

Completed: 2026

Skills Learned: Python, Django, React.js, HTML5, CSS3, JavaScript, Bootstrap, REST API, SQL, GitHub
